## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 8\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

A local municipality is implementing an online voting system for a community event and wants to ensure that only eligible voters (those aged 18 or older) can participate.

Your task is to develop a program that validates the age of individuals attempting to vote online. If the user's age is below 18, the program should throw a custom exception, `InvalidAgeException`, preventing them from casting their vote. If the input is invalid, catch the appropriate `InputMismatchException` and print the in-built exception message.

##### ***Input Format***

The input consists of an integer representing the age.

##### ***Output Format***

If the age is 18 or older, print "Eligible to vote"

If the age is below 18, print "Exception occurred: InvalidAgeException: Age is not valid to vote"

If there is any other type of exception, print "An error occurred: " followed by the in-built exception message.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 20

Output: Eligible to vote

### **Answer**

```
// You are using Java
import java.util.*;
class InvalidAgeException extends Exception{
    public InvalidAgeException(String sen){
        super(sen);
    }
}

class sample{
    public static void ageCheck(int num) throws InvalidAgeException{
        if(num<18){
            throw new InvalidAgeException("InvalidAgeException: Age is not valid to
vote");
        }
    }
    public static void main(String args[]){
        try{
            int n;
            Scanner scanner=new Scanner(System.in);
            n=scanner.nextInt();
            ageCheck(n);
            System.out.println("Eligible to vote");
        }catch(InputMismatchException e){
            System.out.println("An error occurred: "+e);
        }
    }
}
```

```
        }catch(InvalidAgeException e){  
            System.out.println("Exception occurred:"+e.getMessage());  
        }  
    }  
}
```

**Status : Correct**

**Marks : 10/10**
